

Create a Custom Nav Bar in D2L

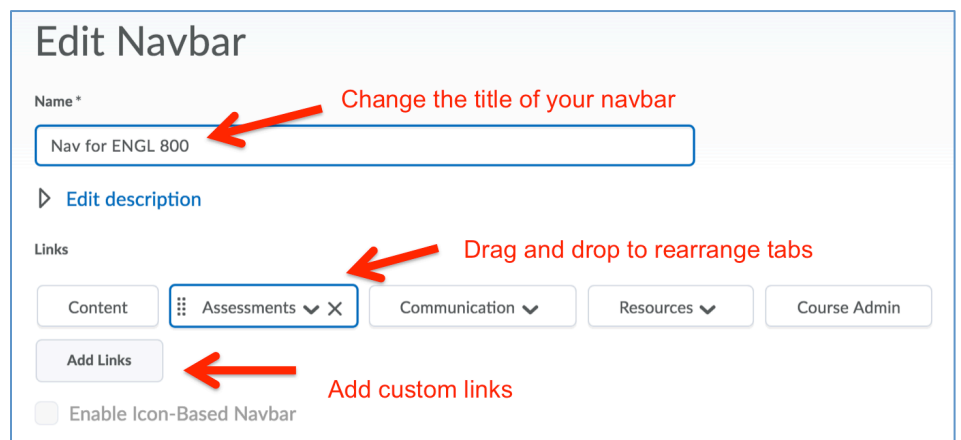

Step 1: Hovering your cursor on the Navigation Menu in any D2L course site will make a “more tools” icon appear on the right hand side. Click this button and then select “customize this navbar.”

Step 2: D2L will prompt you to create an editable copy of the navbar and set it to “active.” Click “Yes! I’ll work with a copy of the navbar.” Note: you can change this later by going into “Course Admin” and clicking on “Navigation & Themes.”

Step 3: Change the title of your NavBar to something descriptive, drag and drop the links to rearrange the tabs at the top of your D2L site, and add custom links.

Step 4: When you click on “add links,” you can create a custom link (any URL), or you can link to sections of the D2L site (like Quizzes), or you can create custom groups (drop-down menus).
